

Europass Mobility Case Study

Wakefield College 2010, Sweden

The Participants:

National Diploma Sports & Exercise Science Students and a Foundation Degree in Commercial Photography Student.

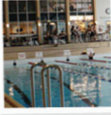

"The students thoroughly enjoyed their placements and returned to College feeling more independent and confident; they feel that having the Europass Mobility Document will give them a competitive edge when they apply to further their education or to enter employment" Wakefield College

The Mobility Experience

The Students undertook their first work experience in an internal environment earlier in the year in Sweden. They worked in colleges delivering sports sessions, and at a leisure park providing swimming lessons and pool and slide maintenance.

They were captured on film by the photography student who was "on assignment" throughout the work placement and documented the experience for all the participants.

The Skills attained

As well as attaining valuable work experience, students were able to develop their language skills and their appreciation of other cultures by participating in new activities - including skiing and barbecues in the snow!
